

I strongly urge the FCC to reject NAB's petition (04-160) regarding satellite radio services. I am baffled that the NAB has decided to cease XM's Instant Traffic & Weather services and will be absolutely shocked if the FCC allows the petition. Pick a reason: free enterprise, First Amendment rights, consumer desires, services to those who don't have access to information (e.g., I live in central Illinois, but frequently travel and want to know the conditions and forecast at my destination). Do the right thing and reject this frivolous attempt by the NAB to protect its own at the consumer's expense.
